
Static Krylov sensitivity: k=3 → k=8
a
α = −0.10
b
α = −0.175
entropy
bond / L
center k3
center k8
ferro_j2 k3
ferro_j2 k8
d
gap sensitivity
spin gap (J⊥)
e
dimer sensitivity
dimer RMS
f
connected sensitivity
staggered connected
k3
k8
α = −0.100 center
α = −0.100 ferro_j2
α = −0.175 center
α = −0.175 ferro_j2
deterministic audit only; Sz1 initialization is fixed center and not an independent start; no phase/convergence claim
